

Four Zone 160 Watt Commercial Amplifier

PL200M 160W commercial amplifier

Features

The PL200M is the next generation of Speco Technologies' commercial amplifiers. This advanced unit features matrix technology, letting you route up to 5 separate inputs to 4 distinct zones. This allows you to simultaneously play a different source in each zone. Assigning a source to a zone is as easy as pressing a button, and each source has its own separate gain, treble, bass and volume controls. Three of the inputs feature a unique universal plug allowing for flexibility of connecting either an XLR or a 1/4" plug into the same input. Ideal for offices, hospitality, hotels and more.

- Simultaneous playback of up to 5 sources into up to 4 zones
- Telephone paging function and monitor output for a limited music-on-hold function
- Microphone 1 priority with VOX mute function
- Intelligent cooling fan
- RoHS compliant
- Separate controls (gain, bass, treble, volume) and mute for each source
- Separate volume control & LED level indication for each zone
- 19" rack mount design with built-in handles (3U)

Specifications

3 XLR / 1/4" combination inputs with phantom, mic or line level selection switch / 2 RCA inputs
4 sets of 4 Ohms / 8 Ohms / 25/70V outputs
40W RMS power output per zone for 160W RMS total
Frequency Response: 60Hz – 17kHz (±3dB)
Dimensions: 19" (W) x 5.2" (H) x 12.2" (D)
Weight: 33.3 lbs.
