

3G Cell Radio Module

3G Cell Radio Module - AT&T

SKU: 2GIG-GC3GA-A

UPC: 8-17082-01052-6

2GIG Technologies is pleased to announce the addition of a 3G Cell Radio Module for Go!Control Security Systems. The new 3G module provides reliable 2-way-voice to a Central Station, transmits security information to online portals, and delivers the latest Over-The-Air firmware updates to the 2GIG Control Panel. Take advantage of 3G speeds, reliability, and longevity with this new module.

FEATURES

- 3G (HSPA) cellular technology
- Broad service area coverage
- Two-way voice
- OTA updates
- External antenna

PRICING

Contact your 2GIG Distributor or Sales Representative for pricing details.

SYSTEM REQUIREMENTS

The 3G Cell Radio Module works with the Go!Control security panel and the security panel **must have firmware 1.9.5 or higher.**

WARRANTY

The 3G Cell Radio Module ships with a standard 1 year limited warranty. Please refer to the Install Guide for specific warranty details.

FREQUENTLY ASKED QUESTIONS

Q. Why is 2GIG launching a 3G cell radio module?

A. With the announcement that AT&T will discontinue support for GSM (2G), 2GIG is launching a 3G (HSPA) cell radio module that is expected to have long-term network support and broad coverage.

Q. Is a 4G (HSPA+) cell radio better than 3G (HSPA)?

A. Some competitors provide a 4G (HSPA+) module with claims that they are superior to 3G (HSPA) modules. In the M2M market HSPA+ offers no advantage over HSPA modules in terms of longevity or reliability. In fact, HSPA+ technology will generally cost more than HSPA.

Q. Will the 3G cell radio module work on currently installed Go!Control panels?

A. Yes, dealers can remove the current GSM module from panels that are already installed and replace it with a 3G module.

Q. Do I need to use the antenna that comes with the 3G cell radio module?

A. We recommend that you use the antenna that comes with the module.
