

Title:	RN TurboHD v3.5.22	Version:	v3.5.22	Date:	011918
Product:	TurboHD DVRs	Build:	171018	Page:	1 of 2
Action Required:	None, Information Only				

■ Reasons for Upgrade

Upgraded in response to customers' usage habits, and marketing demands for new PoC functions, added new functions, modified miscellaneous existing functions, enhanced product's quality, and a incorporated a variety of other changes to meet customers' requirements.

■ Main Features

- Update of PoC Connection Capacity
 - Enhanced the maximum PoC connection capacity from all channels AF to all channels AT cameras.

Device	Past	Now
4-ch device	4-ch AF cameras	4-ch AT cameras
8-ch device	8-ch AF cameras	8-ch AT cameras
16-ch device	16-ch AF cameras	8-ch AT +8-ch AF cameras or up to 12-ch AT access

- For 16-ch device, supports hybrid access of AT and AF camera as follows:

AT camera access	12	11	10	9	8	N (0~7)
AF camera access	0	2	4	6	8	16-N

- New support prompt on live view when there is not enough power for the connected PoC cameras.

- To avoid an AT camera from being prevented from using all functions, PoC DVRs don't provide power for AT PoC cameras even if the cameras work under the AF model and display "NO VIDEO" and "Insufficient Power for PoC."
- Fixed the issue that when a D0T camera was connected to a K Series DVR, the video signal may have been lost for approximately 3-4 seconds occasionally before coming back.
- Other functions modified
- LPR function will hide the country selection in the v3.5.30 version.
