

LYNX Touch 5210

Your Connected Business

All-in-One Business Control System

Security, automation, energy savings
and convenience in one economical system

Protected and Connected

The Honeywell Home LYNX Touch all-in-one control system provides superior, round-the-clock protection for your small business. It lets you control security and automation functions, view video and more—right on the brilliant, full-color touchscreen or on mobile devices around the premises. It's the best way to stay protected and connected.

Brilliant, Full-Color Touchscreen

- The crystal-clear 4.3" display simplifies operation with graphics and menu-driven prompts
- Icons and words are large, clear and easy to read
- Two dedicated keys for easy access to the home screen and emergency functions

Automation & Energy Management

You can control and automate your thermostats, garage doors, lights, locks and water valves directly at the LYNX Touch display, around your business via Wi-Fi® enabled devices or remotely when using Resideo Total Connect Remote Services.

Mobility at Work

Our LYNX Connect App¹ lets you use your Wi-Fi enabled iOS or Android™ devices for easy, on-premises system control and video viewing. Keep an eye of the front of the store from the stockroom, unlock a door for a delivery and more.

Garage Door Control

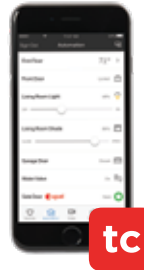

Control up to three garage doors² and know whether they're opened or closed right from the touchscreen, on your mobile devices or remotely with Total Connect. You can close the door if it is left open accidentally, schedule it to close after a specified period of time or at a certain time every night. You can even arm the system when the garage door is open—helping to avoid false alarms.

Two-Way Voice

The optional two-way voice feature lets central station operators listen in and talk to you when an alarm signal is received³—ensuring that the proper response personnel can be dispatched to your home should the need arise.

Total Connect Remote Services

- Control your security system and home automation functions, view live video and receive email and video notifications anywhere in the world on mobile devices
- Get location-based weather, traffic and news delivered right to the touchscreen

Connect to the possibilities today! Contact your security professional to custom-design a system with options that work for your lifestyle and budget.

¹App available for a nominal fee in the Apple® iTunes® App Store or Google Play Store.

²Additional equipment required. Not compatible with certain garage doors and garage door openers. Garage door control must have working entrapment protection. Contact your security professional for details.

³Excluding fire or carbon monoxide alarms.
