### DESCRIPTION

ULISSE PTZ camera unit ensures maximum video surveillance coverage in all outdoor environments, even the most difficult. The accurate top-mount configuration guarantees long-range vision and continuous horizontal axis rotation, combining high speed with absolute tracking accuracy, both in manual mode and in patrol mode.

ULISSE PTZ camera unit ensures maximum video surveillance coverage in all outdoor environments, even the most difficult.

This model can contain cameras with compact lenses.

The versions with the integrated camera ensure excellent image quality, even in poorly lit environments.

To ensure detailed images even during the night hours, versions are available with LED illuminators, with infrared light or white light.

The PTZ unit can be equipped with a wiper for removing rain and dust from the front glass; there is a wide selection of jerry cans with washer pump, different capacities and heads.

The optimal operation is ensured in very hot environments up to 60°C or in very cold environments up to -30°, thanks to optional enhanced heating.

Models are available for vision with a thermal camera.

<sup>1</sup> To ensure the performances, the two illuminators must be correctly aligned.

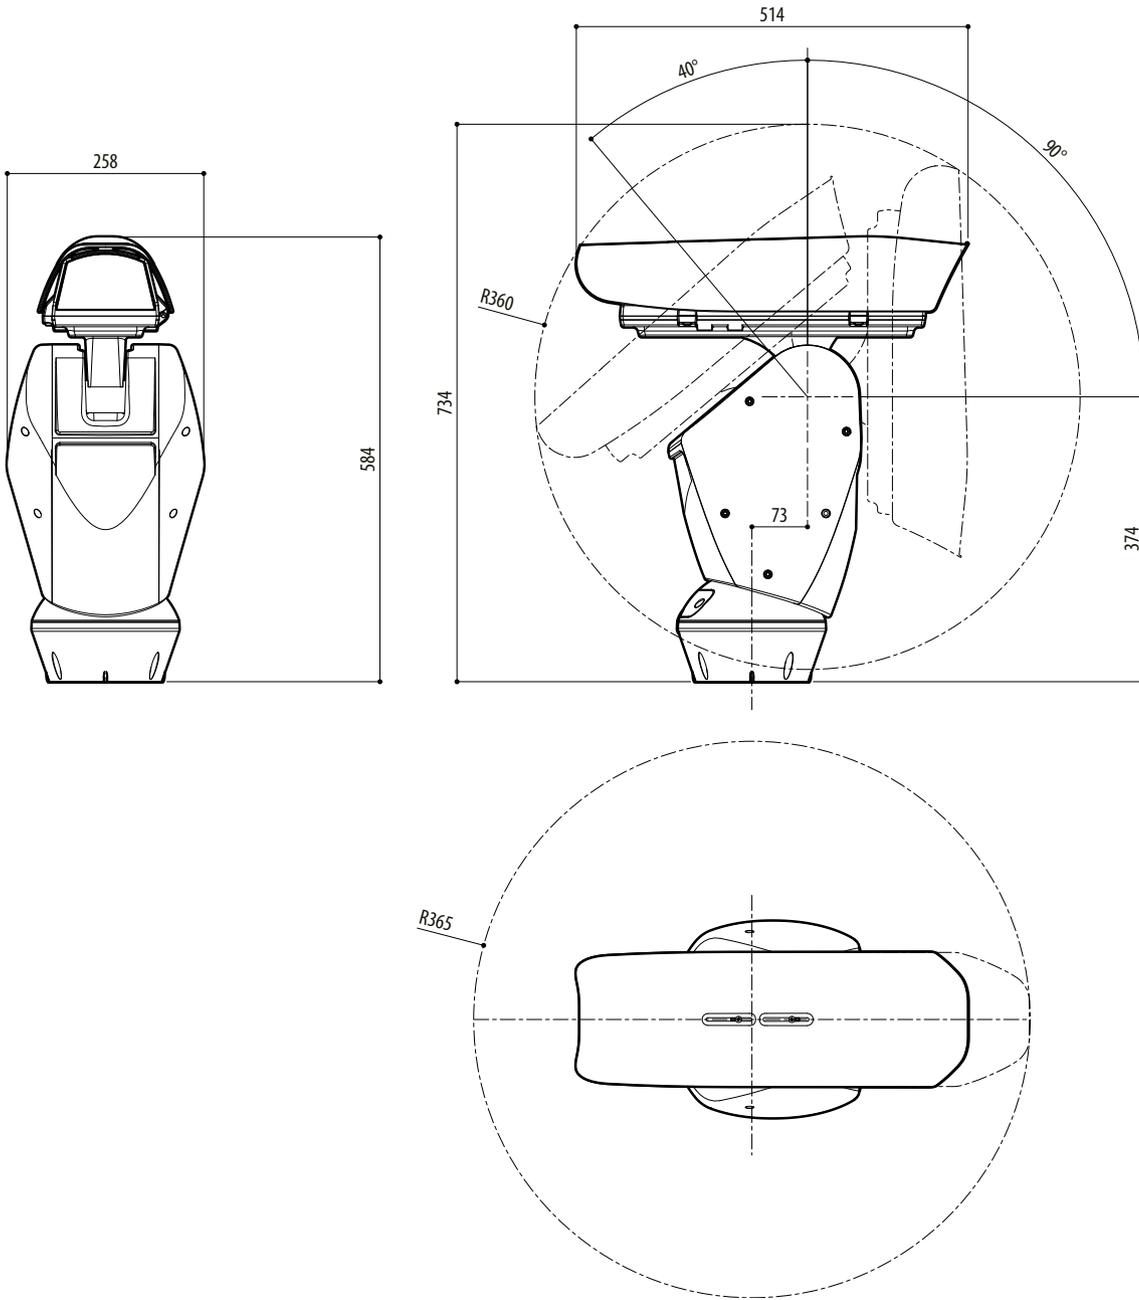

<sup>2</sup> ASS: auto slow shutter mode set.

<sup>3</sup> HFOV - Horizontal Field of View: width of the illuminated area at the maximum reachable distance.

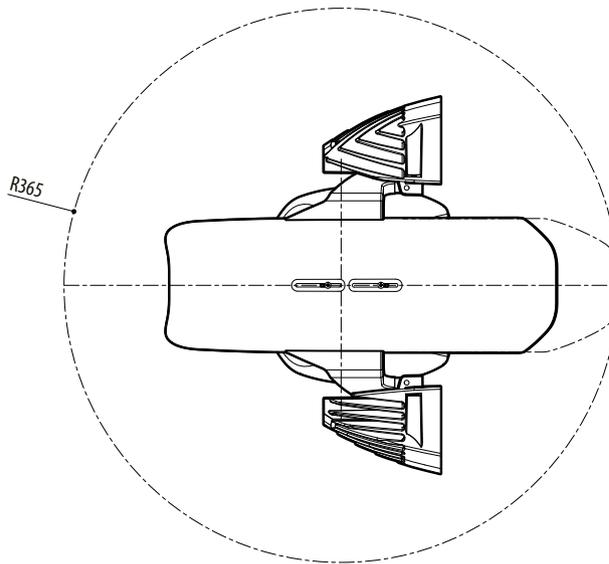

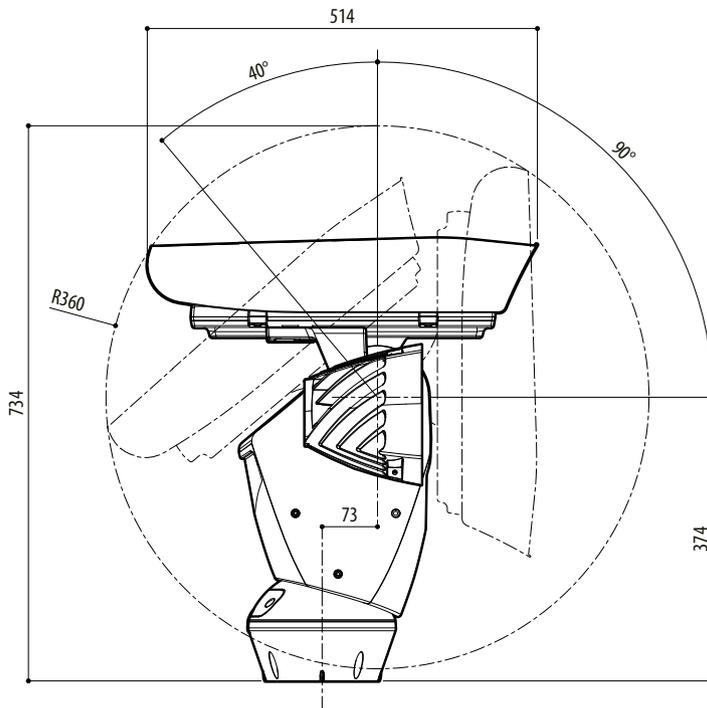

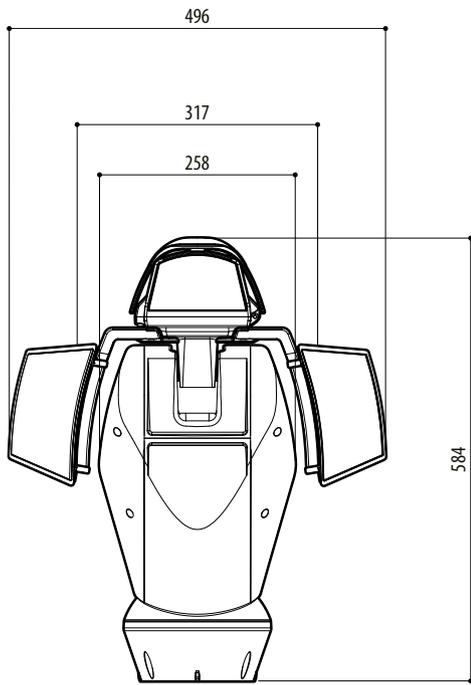

The distances are in meters and refer to the displaying of images at night time which have enough quality to identify and classify an abnormal situation and the type of subject within the range of the pan & tilt unit. The distances also depend on the reflection coefficient of the surfaces present on the illuminated scene.
