ESPRIT COMPACT PTZ CAMERA

2 MP	4 MP	8 MP

The Esprit Compact is a hardened, mission-critical pan-tilt-zoom (PTZ) camera that can withstand the most extreme environmental factors. This security camera is built to withstand most outdoor environments while maintaining continuous clear, high-resolution live and recorded video, with up to 8 MP and 40x zoom. Built for operations that have extreme operational requirements, this camera is ideal for monitoring cities, ports, industrial plants and enterprise facilities.

Designed to have superior strength and durability, it is tested to MIL-STD-167-1A and 810G, allowing for extreme shock and vibration tolerance. It also is NEMA TS2 and IP66/67 rated to withstand extreme weather, shock, vibration and humidity.

The Esprit Compact is built with Smart Analytics, powered by Motorola Solutions, equipped with ONVIF Profile S, G and T and is NDAA-compliant, allowing for open connectivity with Pelco VideoXpert and leading partner VMS'.

FEATURES

SMART ANALYTICS WITH AUTO-TRACKING POWERED BY MOTOROLA SOLUTIONS
Detects more objects with expanded object classifications and automatically tracks objects in zone for faster, decisive responses.

WIDE DYNAMIC RANGE
Captures high-quality image details in scenes with dark and light backgrounds per IEC 62676-5.

DUST & WATER RESISTANT
IP66/67 rating for resistance from dust and water.

ONVIF® COMPLIANT
ONVIF Profile S, G, T and M conformance for easy integration with any third-party VMS.

EASY INSTALLATION
Simplify installation and maintenance processes by installing only one camera instead of two. The compact design of this camera facilitates its installation, particularly in remote areas.

H.264 AND H.265 WITH SMART COMPRESSION
Optimizes compression levels for regions in a scene to help maximize bandwidth savings and keep storage costs down.

IMPACT RESISTANT
IK10 rated for 20 joule impact resistance.

PEACE OF MIND
We back our Esprit Compact camera with a 5-year industry-leading warranty, with onsite support and 24/7 phone support.

ANALYTICS SPECIFICATIONS

SUPPORTED ANALYTICS EVENTS*	
Objects in Area	The event is triggered when the selected object type moves into the region of interest.
Object Loitering	The event is triggered when the selected object type moves into the region of interest, then stays for an extended amount of time.
Objects Crossing Beam	The event is triggered when the specified number of objects have crossed the directional beam that is configured over the camera's field of view. The beam can be unidirectional or bidirectional.
Object Appears or Enters Area	The event is triggered by each object that enters the region of interest and can also be used to count objects.
Object Not Present in Area	The event is triggered when no objects are present in the region of interest.
Objects Enter Area	The event is triggered when the specified number of objects have entered the region of interest.
Objects Leave Area	The event is triggered when the specified number of objects have left the region of interest.
Object Stops in Area	The event is triggered when an object moves into a region of interest and then stops moving for the specified threshold time.
Direction Violated	The event is triggered when an object moves in the prohibited direction of travel.
Sabotage Detection	The event is triggered when the scene unexpectedly changes.

*Pelco Smart Analytics powered by Motorola Solutions.

| AUTO-TRACK OBJECTS IN AREA	
Auto-track Objects in Area	The event is triggered when the selected object type moves into the region of interest defined at the home position. The camera will automatically reposition to track the object, returning to the preset home position once object is lost.

PELCO ELEVATE SUPPORTED FEATURES	
Image Health	Detects incremental changes in the cameras view, such as position shifts or obstructions. Notifies users through ONVIF conformant events and summarized email reports.
